Power to Panel Permit

A Power to Panel Permit is issued from the Development Services – Building Department office to a contractor **and** owner for construction use only. It is to allow full power to the building for testing of electrical systems such as lighting, heating, air-conditioning equipment, emergency systems, etc. The Power to Panel Permit will be issued once the proper signatures have been attained below and will be closed upon issuance of a certificate of occupancy.

This permit does not allow storage of personal belongings or occupancy of the structure or any portion thereof. Any code violation shall result in the disconnection of electrical service from the premises and a \$500 penalty. A certificate of occupancy shall not be issued until this penalty is paid and any violations are corrected.

I, the undersigned, do hereby understand and agree to all the above and hereby release Payson City from any liability for the connecting or disconnecting of electrical service.
