

My wife and I have lived here in Payson now for over 16 years and thoroughly enjoy this area. I have served on school committees and taken advantage of other volunteer opportunities and enjoy serving. I have served on the City Planning Commission for approximately 8 years and now as a member of the City Council since June of last year. I would like to continue this service to the residents of Payson City as one of the members of the City Council. I feel that I have a great deal to offer the residents and the community and that my engineering background helps me make practical decisions that benefit the citizens while still allowing for growth and development. If we don't plan for growth effectively, we will either be overtaken by the growth that is coming or be unable to properly manage and provide for everyone in our community. Proper growth can benefit us all. Please support me in this upcoming election and I will try to help the entire community as best as I can.
