

I was born and raised here in Payson. I love this city. Being raised on a Fruit Farm I love the outdoors and work. I have a great appreciation for water and land. Which has transferred well to my Real Estate Career. I attended Weber State University and met my wonderful wife there. I convinced her to move to Payson with me and now she loves it. I have hope for the future of our city, state, and country. I will protect the personal rights and future of Payson City residents.
