Holindrake, City Recorder<br>Jason Sant, City Attorney (online)<br>Robert Mills, Development Services Director<br>Travis Jockumsen, Public Works Director/City Engineer<br>Scott Spencer, Fire Chief<br>Jill Spencer, City Planner<br>Tracy Zobell, Parks & Golf Director<br>Karl Teemant, Community Services Director<br>Shawn Black, Power Director (online) |
| OTHERS            | Samuel Sorenson, Diane Jensen – Payson/Santaquin Chamber of Commerce,<br>Lacey Smith, Mark Beauchamp, Utility Financial Services, Jillian Jurczyk,  |

<u>MOTION: Councilmember Moss – To appoint Brett Christensen as Mayor Pro Tem.</u> Motion seconded by Councilmember Rowley. Those voting yes: Brett Christensen, Taresa Hiatt, Anne Moss, Ryan Rowley. The motion carried.

#### A. CALL TO ORDER

William R. Wright, Mayor, called this meeting of the City Council of Payson City, Utah, to order at 6:02 p.m. The meeting was properly noticed.

#### B. PRAYER & PLEDGE OF ALLEGIANCE

Prayer offered by Ryan Rowley. Pledge of Allegiance led by Samuel Sorenson.

#### C. CONSENT AGENDA

1. Approval of the April 3, 2024, City Council Meeting Minutes

Utility Financial Services

- 2. <u>Proclamation Kevin Bacon Day</u>
- 3. <u>Proclamation Municipal Clerks Week</u>
- 4. <u>Resolution UAMPS Firm Power Supply Project Prepay Agreement</u>
- 5. <u>Resolution Addendum agreement with South Haven Farms</u>
- 6. Resolution Real Estate Purchase Contract with Troy Lerwill
- 7. <u>Resolution Appointment of City Engineer</u>

**MOTION:** Councilmember Moss – To approve the consent agenda as listed. Motion seconded by Councilmember Hiatt. A roll call vote was taken as follows and the motion carried.

Yes - Brett Christensen Yes - Taresa Hiatt Yes - Brian Hulet Yes - Anne Moss Yes - Ryan Rowley

# D. PETITIONS, REMONSTRANCES & COMMUNICATIONS

1. Payson/Santaquin Chamber Business, Employee, or Community Service Award

Diane Jensen announced the first quarter Chamber Business Award to Menchies owned by Wendi and Craig Shipley.

2. Payson/Santaquin Chamber of Commerce Quarterly Report

Anne Moss stated she attended the monthly meeting yesterday morning. She encouraged businesses in the community to join the Chamber and promote their business and be involved in the community. Sponsors are needed for various activities as well as scholarship donations for future business owners and the high school. It is a great way to get involved and get to know the community.

Diane Jensen explained the Chamber held three breakfast club meetings, three meet and eats at Hot Rod Diner, held the Annual Gala, five ribbon cuttings, supported a couple bills and bagels events, a bowling night event, and coordinated a great business event with Congressman Burgess Owens. Congressman Owens visited Chubby's, Payson Fruit Growers, MTECH site, Job a Pop, Rocky Mountain ATV, Olson's Green House, and WICP Payson Tech. She and Jim Rowland attended the Chamber Winter Conference on Capitol Hill. The chamber office has moved to the ERA building, which is cost effective. The Chamber Community Guide Magazine was mailed to 15,000 homes and businesses with facts and information about the cities and businesses. The Chamber is working on the first quarterly community service award and focusing on the employee award next month. The Passport to Summer begins for school kids for the summer where the kids visit businesses and get their passport stamped. Last year 600 kids participated. A summer pool party will be held for all the kids who participated in the activity. Jones Paint has committed to joining the Chamber as a gold member; we are excited to have them involved.

3. Public Forum (6:12 p.m.)

Lacey Smith is reaching out for assistance regarding concerns in her neighborhood. She lives in Payson View Estates and the builder is Patterson Homes. Before coming tonight, she has spoken with Patterson, city officials, police chief, and multiple police officers and nothing gets done. She voiced concerns with unfinished yards, slope and erosion issues with dirt going into the storm drain, vacant lots full of weeds that seed into our established grass and neglected vacant lots full of trash and junk. She was told homeowners were sent certified letters to complete their landscaping and that the landscaping bond had gone back to the city. The home at the bottom of the hill has become a junk yard with multiple abandoned cars. She has contacted the Patterson representative who doesn't seem to care so she feel it falls on city to speak to Patterson. She is an avid outdoors person and loves ATVs and dirt bikes at the appropriate spot. There is nonstop dirt bike riding behind her home where it is posted no trespassing. Patterson told her to contact the police. The police has been there and talked to them. One person said James Patterson gave him permission to ride there. Because there are no homes behind them, the engine noise bounces off the mountains. Her yard has been driven on and the neighbor's yard has been ripped up multiple times. The riders have called them dirty names and flipped them off. Patterson isn't blocking off the area, and the city trail is being ripped up. She is at a standstill, and everyone is tired of it. She doesn't feel she should constantly call the police and then the dirt bikes are gone when the police arrive. The police have been great, but the city needs to contact Patterson. It makes her hate where she lives.

Councilmember Hiatt realizes this is being caused by Patterson and asked Jason Sant what can be done. What about the yard with the abandoned vehicles and junk and the properties that aren't landscaped? Does the city have fines that can be issued? The dirt bikes are tearing up the city trail.

Jason Sant stated that until Patterson finished the homes, there is nothing that can be done except call the police. The properties can be cited and fined. The yard landscaping will be installed in the spring. If the dirt bikers have permission, they can be there. If not, they can be cited. The city can look into the trail issue.

Robert Mills noted staff had a good conversation with Patterson a couple weeks ago and brought up the primary concern with the homes not abiding with the landscaping standards. He sent the certified letter to the property owners. The city needs to move to the enforcement stage. Some of the homes have a landscaping bond that can be foreclosed on, which won't cover the cost of landscaping. Patterson is aware of the situation and are not pleased with the responses from the homeowners with non-landscaped yards. Patterson is making systematic changes for future phases to provide most of the landscaping themselves. Violators need to be addressed quickly. He will follow up with Patterson on the vacant lots and these issues and provide an update at the next meeting.

Councilmember Hiatt asked if the bond amount could be increased. She has seen the situation, and it's bad.

Jason Sant noted the state law changed, and the city is no longer allowed to ask for a landscaping bond.

Robert Mills clarified the city can't require a bond but can still require landscaping before a certificate of occupancy is issued. The city has allowed a bond if the homeowner chooses to do so. The bond amount does need to be increased. This area does require front and back landscaping for stabilization requirements.

4. Staff and Council Reports (6:27 p.m.)

## Staff Reports

DEVELOPMENT SERVICES – Robert Mills thanked the council for attending the joint work session with Elk Ridge City last week and hoped it was helpful. He would like feedback from the council in order to determine future planning meetings.

PARKS & GOLF - Tracy Zobell stated a senior state golf tournament was held at the Gladstan Golf Course today. He introduced two new golf assistants, Remington Newell and Tanner Nicholls. It's

great to have them and they are going through the PGA program. Remington Newell stated he likes the historical buildings in Payson and the Nebo Loop Road and forest. Tanner Nicholls spent lots of hours at the Payson pool when he was younger, and the first girl he dated was from Payson. He's excited to work here.

RECREATION – Karl Teemant reported the Recreation Department has moved to the Wilson Elementary School, 517 South 600 West. An awning has been ordered, and he'll get something in newspaper. Arbor Day is April 25 with tree planting at 1:45 p.m. at the East Hills Park. Cinco De Mayo will be celebrated on May 3 at the Peteetneet amphitheater from 5 p.m. to 9 p.m. with cultural entertainment.

FIRE AND AMBULANCE – Chief Spencer stated the Great Utah Shake Out is tomorrow at 10:15 a.m. Live fire training is this Saturday and involves the surrounding cities. Staff is also participating in training at a house in Haskelville. The open burn ends the end of April.

#### Council Reports

Councilmember Rowley reported he and Shelby Bohling, Communities That Care Coordinator, went to Springville City to see how their youth council is run in order to start up the Payson youth council. It's an opportunity for freshman to seniors to tour facilities, listen to managers, attend field trips, and be involved in the community. They will get out and serve the community as well as partner with businesses and entities. The program should be up and running by August with the new school year. The secret to the owners of Menchies success is positive attitude. He's grateful to have them as part of Payson.

Councilmember Moss noted the owners of Menchies are amazing people. She questioned the construction on 930 West that has been going on for a long time and is causing issues. She questioned if penalties accrue when it takes so long. Also, the vacant lot issue Ms. Smith brought up needs to be looked into as well. Travis Jockumsen stated it should be close to repaying and is being done by a private developer. There are no fines, but the project could be shut down, which doesn't help speed it up. He will look into a penalty fee. Robert Mills noted the city can do enforcement, liens, etc. against these properties.

Councilmember Hulet stated the city received a tourism grant for \$45,000 for the food hall for a feasibility study. Last Saturday, he hiked five miles of trails in Payson. He doesn't see where the city has any trail maps available for the public. Congratulations to Jonathan Knight on his promotion as City Engineer; he's doing a great job. The Economic Development Board held a retreat last Monday and discussed the Payson Strategic Plan.

Mayor Wright thanked Councilmember Christensen for being the mayor pro tem tonight. He is in St. George attending the power conference and Utah League of Cities and Towns conference.

Councilmember Christensen is excited to have the pressurized irrigation on earlier this year for landscaping. He hopes citizens are wise with it and hold back until needed.

#### E. ACTION ITEMS

1. <u>Resolution – Appointment of new Planning Commission Members and Oath of Office</u> (6:40 p.m.)

Presentation:

Councilmember Christensen stated the recommendation for the Planning Commission appointments is Kirk Beecher and Rachel Becker for four-year terms and Perry Adams for a two-year term.

# **MOTION:** Councilmember Rowley – To approve the (resolution) appointment of new planning commission members and proceed with oath of office. Motion seconded by Councilmember Hiatt.

A roll call vote was taken as follows and the motion carried.

| - | Brett Christensen |
|---|-------------------|
| - | Taresa Hiatt      |
| - | Brian Hulet       |
| - | Anne Moss         |
| - | Ryan Rowley       |
|   | -<br>-<br>-<br>-  |

2. <u>Resolution – Appointment of new Board of Adjustment Members</u>

#### Presentation:

Councilmember Christensen stated the recommendation for the Board of Adjustment appointment is Michael Hardy for a five-year term.

# <u>MOTION: Councilmember Moss – To approve (resolution) Michael Hardy for the Board of</u> <u>Adjustment.</u> Motion seconded by Councilmember Rowley. A roll call vote was taken as follows and the motion carried.

| Yes | - | Brett Christensen |
|-----|---|-------------------|
| Yes | - | Taresa Hiatt      |
| Yes | - | Brian Hulet       |
| Yes | - | Anne Moss         |
| Yes | - | Ryan Rowley       |

Judge Jewell swore in the members of the Planning Commission and Board of Adjustment.

Robert Mills expressed his appreciation for these citizens in volunteering for these positions and service.

3. <u>Presentation/discussion regarding Power Impact Fees</u> (6:45 p.m.)

#### Presentation:

Shawn Black introduced Mark Beauchamp and Jillian Jurczyk with Utility Financial Services. They will discuss the changes needed to increase revenue to complete needed power projects and properly allocate the power impact fee.

Mark Beauchamp explained several months ago, he presented an impact fee report based on a capital improvement plan that needed to be updated. Since that time, the capital improvement plan has been revised and updated, which changes the impact fee. Impact fees try to accomplish two things First, growth to pay for growth the existing rate payers. Second, fairness to new customers who present a

value for fixed cost recovery. To accomplish this, the impact fee and infrastructure are evaluated and then the benefits provided are subtracted.

Table 4 – Cost of Additional Investment in Plant

Table 4 is the updated impact fee analysis. The second column from the right is the Total to be Spent, which projects almost \$77 million of capital improvements projected over the next six years for various projects. Also identified is the percentage related to additional growth or what should be allocated to new customers. The Impact Fee Cost column summarizes the percentages related to growth over the next six years totaling just over \$41 million, which will be bonded for over the next 20 years. Therefore, the impact fee analysis looks at actual expenditures to pay back the debt service over the next six years.

|   |             | Bonding -    |              |              |              |              |              |              | Six Year      |

#### Table 5 – Calculation of Impact Fees by REU

The \$20,477,060 in the Six Year Total column is the amount needed to recover from new customers over the next six years less the current impact fee balance of \$1,592,226. This makes the net impact fee recovery \$18,884,834 from new customers over the next six years.

| Determination of Residential Equivalent Units          | Base | e Impact Fee -<br>200 Watt |
|--|------|----------------------------|
| · · · ·  |      |                            |
| Actual kWh Purchases 2023                              |      | 140,719,395                |
| Projected kWh Purchases 2028                           |      | 168,827,225                |
| Change in Purchases adjusted for losses                |      | 27,105,388                 |
| Average Residential kWh annual use                     |      | 8,692                      |
| Residential Equivalent Units                           |      | 3,118                      |
| Total Investment                                       | \$   | 18,884,834                 |
| Average cost per Residential Equivalent                | \$   | 6,056                      |
| Less Maximum Utility Contribution                      |      | 1,460                      |
| Impact Fees to be recovered per Residential Equivalent | \$   | 4,596                      |

The projections show 3,118 new residential customers (residential equivalents) coming into the system over the next six years. The impact fee related cost for those 3,118 customers equates to \$6,056 per residential equivalent. This is then adjusted by \$1,460 for the value these customers provide and brings the impact fees to be recovered per residential equivalent to \$4,596. Therefore, a 200 AMP 120/240-volt service requires \$4,596 to be recovered through impact fees. This information is used to develop a rate schedule based on amperage for the different types of customers added to the system, which is what the city council needs to approve. A typical residential home with a 200 AMP service would be charged \$4,596 for 120/240 volts, \$6,899 for 120/208 volts, and \$15,920 for 277/480 volts. Updating impact fees only affects new customers or developers.

#### Impact Fee Rate Comparison

The above impact fee rate comparison shows several rate comparisons with the average 200 AMP at \$3,179 and Payson City at \$4,596. Heber City recently updated its impact fee to \$6,310. Utah is a high growth state and Payson is a high growth area. As a result, there are a lot of additional investments being made in Utah to serve these new loads. Some of these utilities haven't updated their impact fee for several years so most of these will be going up. Tonight, the council needs to review and consider approving these impact fee related costs.

| 200  | 48                                  | 14.00        | 6.30            | \$          | 3,978   | \$ | 4,596  | 16%      |  |  |  |  |
| 400  | 96                                  | 19.00        | 8.55            | \$          | 5,399   | \$ | 9,192  | 70%      |  |  |  |  |

The above table compares the proposal to the current fees. For example, the city charges \$2,021 for a 200 AMP service when it costs the city \$4,596. If this money isn't recovered from the new customer, it goes into the rate base and is paid by the existing rate payer. The cost for residential and commercial services goes up but the larger three-phase services go down as shown in Table 9 below. The rate schedule is set up to be consistent and proportional, which is why it shows positives and negatives.

|       | Commercial 3 Phase (120/208V) |              |             |    |         |    |        |          |  |  |  |  |  |

Table 9 - 120/208 Voltage Current vs. Proposed Fees

#### Council Discussion:

Discussion regarding 200 AMP and 400 AMP services are based on customer preference. Developers may question the changes, but the costs are passed onto the new homeowner. The impact fees for new commercial are fairly in line with other areas in Utah. The city definitely doesn't want to lose money on new homes, which is a good goal. The power impact fee was previously changed in about 2014. A large apartment complex is charged per individual meter/residential unit. The impact fee is based on the size of the meter. Previously, commercial users were paying a disproportionate cost compared to residential users. The new proposed impact fee has balanced the cost/fee. Impact fees are typically reviewed and updated when there is substantial growth and large projects.

The next step is to schedule a public hearing and send the proposed impact fee to the Utah Homebuilder's Association for review. Once adopted, there is a 90-day waiting period before the impact fee goes into effect. The approved impact is also sent to the state.

#### 4. <u>Presentation/discussion regarding Power Rate Increases</u> (7:05 p.m.)

Presentation:

Mark Beauchamp reviewed the financial projection and targets, cost of service results, and impact fee study.

The long-term financial projection is compared to certain key financial targets to ensure the utility is financially stable. This is balanced with the potential rate adjustments on customers as much as possible. The cost of service looks at what classes of service is causing certain costs in the system so each customer on the system is paying a fair share.

Projections are built upon certain assumptions about future growth, inflation, cost changes, and capital expenditures. When looking into the future five years, the only thing certainty is that it will be wrong because a lot of the assumptions may not materialize and could be higher or lower. Projections tent to be fairly close to what occurs. Financial projections should be reviewed more frequently, which is a key part in keeping the utility financially stable. It should be done at least every two to three years. Assumptions keep the cash in balance and rate as minimal as possible. Capital improvements are identified for bonding. Two bonds to fund the capital improvement have been identified in the projection period, i.e., 2025 for \$8,250,300 and 2029 for \$15,209,000. Last year, Payson imposed a 10% rate adjustment for customers, which is included in the projection. He reviewed the following table for current rates.

|        | Projected   | Debt     | Adjusted  |        | Optimal      | Р  | rojected    |    | Projected   |              |           |  |
|--------|-------------|----------|-----------|--------|--------------|----|-------------|----|-------------|--------------|-----------|--|
| Fiscal | Rate        | Coverage | Operating |        | Operating    | In | npact Fee   | ٦  | Total Cash  | Recommended  |           |  |
| Year   | Adjustments | Ratio    | Income    |        | Income       |    | Cash        |    | Balances    | Minimum Cash |           |  |
| 2024   | 10.0%       | 1.08     | \$ (638,4 | 73) \$ | \$ 2,944,040 | \$ | 571,556     | \$ | 3,889,667   | \$           | 8,125,632 |  |
| 2025   | 0.0%        | 1.08     | (627,6    | 42)    | 3,349,798    |    | (529,518)   |    | 2,536,710   |              | 9,011,293 |  |
| 2026   | 0.0%        | 1.06     | (877,2    | 97)    | 3,362,609    |    | (824,930)   |    | 786,216     |              | 9,133,560 |  |
| 2027   | 0.0%        | 1.20     | (964,7    | 39)    | 3,388,077    | (  | (1,639,103) |    | (774,377)   |              | 9,266,605 |  |
| 2028   | 0.0%        | 1.01     | (1,053,1  | 78)    | 3,401,360    | (  | (1,934,515) |    | (2,743,127) |              | 9,397,106 |  |

\*Restricted cash balances are restricted for SESD lawsuit.

The utility should have a minimum cash reserve of about \$8 to \$9 million, which the city is currently substantially below at \$3.8 million even with the 10% increase. Over the next five years, the cash reserve goes negative.

The proposal includes a series of 5.5% rate adjustments to get the utility in line and financially stable as well as minimize impacts on current rate payers. The cash reserve reaches about \$7.5 million by 2028. Optimal operating income deals with depreciation and replacement costs. Determining revenue requirements is not an exact science so minimums are defined. Exceeding the optimal operating target over charges the rate payers. Everything is a balance. He asked if the council is comfortable with the financial projections and the 5.5% rate adjustment. The rates will be designed by whatever guidance the council gives tonight.

Jillian Jurczyk explained the projected impact fee is negative because the revenues are conservative because growth may not happen. There may be a lag between when infrastructure is installed and when the impact fee is paid. It's a timing difference. The cash reserve would go up quicker if growth is quicker. The average residential customer (1,150 KW) will see a monthly increase of \$5.63. A 550 KW resident would be \$4,67 monthly and a 1,500 KW resident would be \$9.87 monthly.

|                                 |    |                 |    | Projected  | Effective % |
|---------------------------------|----|-----------------|----|------------|-------------|
| Customer Class                  | Co | Cost of Service |    | Revenues   | Change      |
| Residential                     | \$ | 9,985,546       | \$ | 8,526,114  | 17.1%       |
| Commercial Electric - No Demand |    | 356,902         |    | 295,313    | 20.9%       |
| City Use                        |    | 924,820         |    | 630,691    | 46.6%       |
| Commercial Electric - Demand    |    | 6,105,443       |    | 5,284,531  | 15.5%       |
| Industrial 1 Electric           |    | 1,958,690       |    | 1,705,285  | 14.9%       |
| Industrial 2 Electric           |    | 915,380         |    | 742,263    | 23.3%       |
| Total                           | \$ | 20,363,652      | \$ | 17,187,786 | 18.5%       |

Electric Cost of Service Results

Mark Beauchamp explained the above table shows the costs to provide services to each customer class. The residential cost of service is higher than the projected revenues and would need a 17.1% increase to balance, but that is not what is proposed. The total system increase should be about 18.5%. The idea is to move each class closer to the actual of providing service over time. Each class would see a 5.5%+/- depending on how much of an increase is needed to reach projected revenues for that class. The council needs to then determine a band width of say 2%, meaning no rate class would increase more than 7.5% or decrease less than 3.5%. This means no dramatic change needs to be made to classes themselves. He recommends a plus or minus 1% making the largest increase 6.5% and the smallest 4.5%.

#### Monthly Charges

|                                 |     |        | Current |        |
|---------------------------------|-----|--------|---------|--------|
|                                 | COS |        | Average |        |
|                                 | Cu  | stomer | Cu      | stomer |
| Customer Class                  | C   | harge  | Charge  |        |
| Residential                     | \$  | 17.79  | \$      | 11.97  |
| Commercial Electric - No Demand |     | 33.68  |         | 15.86  |
| City Use                        |     | 46.42  |         | 6.05   |
| Commercial Electric - Demand    |     | 84.41  |         | 36.63  |
| Industrial 1 Electric           |     | 622.63 |         | 122.09 |
| Industrial 2 Electric           |     | 385.39 |         | 122.09 |

The next aspect that goes into the overall rate adjustment is the fixed monthly charge. The table above shows the current average customer charge at \$11.97, but the cost is \$17.79. This monthly charge covers the cost of the meter, meter repairs/replacement, monthly meter reading, monthly bill, and maintaining service to the facility. These fixed costs don't change based on usage and are still incurred by the city even if electricity isn't used. He recommended moving this slowly about \$1.50 each year to get to the \$17.79. This is a fairness issue and is included in the 5.5%.

Council Discussion: Councilmember Christensen stated the numbers sound fair, and it makes sense.

Councilmember Rowley explained these large bond payments and debts we've discussed rely on power that came quick and cheap through coal-fired power. With the reduction of these and other different sources of power, the cost is different and not as reliable. Coal-fired plants are being taken offline. As this continues, Payson needs to do something to be self-reliant and provide power. One way is to buy better newer generators for the facility to provide power and not buy on the open market, which is volatile and expensive. The council doesn't make these decisions lightly. Doing nothing increases rates as well because power is purchased from other entities at a higher rate. The city needs to be proactive and look to future to be self-reliant. Users need to be more cognizant of usage and use less. Power is so important.

Mark Beauchamp noted the most important point to customers is reliability. Investments must be made to the system to ensure reliability. New generators will ensure a more reliable electric service and caps costs by not purchasing from the open market. This plan directs the city in providing a reliable service. The adjustments are reasonable and are a low-cost, reliable service.

Mayor Wright stated he attended a meetings today with UAMPS and heard much of this as well. There are costs associated with providing power. The city can pay now or a lot more later. He would rather charge smaller rates over time than one big one. New generators give the city the ability to cap and defray the costs. It gives flexibility and benefits the customers and citizens overall. Excess power can also be sold to defray the cost of operation.

Councilmember Hulet noted solar has changed over the last couple of years and Payson has quite a lot of solar customers. The city is actually losing money on these solar customers during day. He wants to put more in the fixed cost by having it go up faster than the variable cost. He would also like to look at rates for those on fixed incomes understanding there are state and federal assistance programs.

Mark Beauchamp stated it makes sense and would help fix part of it. When it comes to solar, there are certain ways to bill them. Net metering was done to incentivize solar. As solar continued to grow over the last five years, utility rates have been impacted substantially. Most utilities are moving away from net metering and into in-flow, out-flow or net billing.

Jillian Jurczyk clarified that a net billing tier went into effect in 2017, which some customers are grandfathered.

Shawn Black noted the city is losing money on solar customers.

Mark Beauchamp would like to have a discussion and do a solar study. It's possible to create a rate for those on a fixed income and different ways to do it. One way is to give a discount on the bill if the resident is at the 200% poverty level or below, which is verified through an outside entity each year. Moving forward, rates will be created based on the 5.5% adjustment with a  $\pm$  1% band width and adjust the customer charge by \$1.50 for the council and staff to review. Additional information is needed to address the solar issue.

## F. ADJOURNMENT

<u>MOTION: Councilmember Hiatt – To adjourn.</u> Motion seconded by Councilmember Moss. Those voting yes: Brett Christensen, Taresa Hiatt, Brian Hulet, Anne Moss, Ryan Rowley. The motion carried.

The meeting was adjourned at 7:50 p.m.

<u>/s/ Kim E. Holindrake</u> Kim E. Holindrake, City Recorder
